**Subject:** Durr Road Bridge and upland disposal of potential solid waste  
**Attachments:** Ecology Comment on 12-057 Durr Road Bridge.pdf

Dear Ms. Clear,

Thank you for your letter responding to the SEPA checklist issued for the Durr Road Bridge project.

You expressed concerns about the upland disposal of dredged material and the potential that we may need a solid waste permit per Chapter 173-350 WAC. We will make sure that the soils and or dredged material are handled in accordance with this WAC. To the best of our knowledge no dredged material will be involved and the soils to be removed do not meet the definition of "contaminated soils" as stated in WAC 173-350-100.

We will contact Gary Bleeker with any questions that may develop.

Sincerely,  
Douglas
